

Dear: Veteran

Thank you for your time and service in our country and letting us be free. And before I thought that Veterans Day was no big deal but in class today I learned and watched some videos about Veterans Day and there is so much more to it I didn't know so thank you so much for fighting for us and putting your life on the line for our country. And I also learned about Memorial Day also my great grandpa was a veteran but he has passed on now he died just when my dad was around my age I'm 11 now. And I have seen some people with missing arms or legs coming back from the army and if you're one of those people then I just want to say thank you for your service and bravery for our country. And it must be super scary and hard work being out there with people yelling at you and I've seen some one who was in world war 2 and they are still alive and that was 80yrs ago. And I would love to say again thank you so so much for your service and fighting for us. Thank you

From: *Evan*
